

GREEN ENERGY - SALT WATER POWER

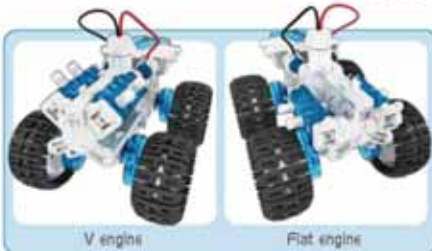

Salt Water FC Engine Car Kit

Item No : 2I-752

- A great and fantastic educational science kit.
- Powered by fuel cell, just add salt water to go.
- Equipped with four-wheel drive mechanical construction.
- Easily handle different types of terrain by its twisted car body design.
- Easily transform from V Engine to Flat Engine.
- The transparent case design allows children to see the rhythm of the piston in vertical or horizontal direction.
- Switch "positive" and negative" connectors to have the car run "forward" or "backward" simply.
- Each single wheel can be adjusted its angle individually, change the car to a different height and shape, also enjoy the great fun for its unique way of moving.
